HUMAN FIRST OF ALL

Your Assistant in Hemodialysis...

Our company, which started to provide services in the field of hemodialysis in 2001, has started production of SANUS Hemodialysis Fistula and Catheter Connection Disconnection Sets in 2017 as a result of R&D studies which are made with a years of experience, knowledge and diligence.

2001 yılından bu yana Hemodiyaliz ve Sağlık Hizmetleri alanında faaliyet yürüten uzman ve tecrübeli kadromuz tarafından, yılların vermiş olduğu bilgi birikimi ve sahadaki deneyimlerimizi titizlikle yapılan AR-GE çalışmalarını ile birleştirerek 2017 yılında SANUS Hemodiyaliz Fistül ve Kateter Giriş-Çıkış Setlerinin üretimine başlanmıştır.

Who/Biz

Who we are?

SANUS is in constant communication with both healthcare institutions and employees and patients, responding to the problems and expectations in the fastest way in innovation / reform day by day and request plans the production stages according to these demands and needs. Since 2001 by combining our years of knowledge and experience in the field with meticulous R&D studies by our expert and experienced staff who have been operating in the field of Hemodialysis and Health Services SANUS started to be produced in 2017 Hemodialysis Fistula and Catheter Connection Disconnection Sets. In addition to the production of these sets, our company produces comprehensive General Surgery, Implant Sets, Abdominal Sets and practical use kits that can meet the needs for use in various surgical operations. Our R&D and production conversion studies continue meticulously by our expert team.

Biz kimiz?

STERILIZATION ROLLS

SANUS CATHETER CONNECTION DISCONNECTION SET

SANUS heat-sealable sterilization reels are constructed from transparent PET/PP multi-layers copolymer film and medical grade paper. Process indicators for steam and ethylene oxide sterilization are applied on the paper surface of the reel and help to differentiate between processed and unprocessed packages.

All process indicators are water based and non-toxic inks and meet or exceed the requirements of ISO 11140-1 standard and provide accurate and clear color change after sterilization process.

Wide range of standard sizes allows optimum choice of a correct-sized pack for each item and for double packing purposes and as a requirement of EN ISO 11607 all equipments, machines and processes used for SANUS sterilization reel manufacturing, process validation has been conducted.

- Excellent microbial barrier
- Comply with ISO 11607, ISO 11140-1 and EN 868-5
- Non-toxic and accurate process indicators
- Clear and accurate colour change
- Strong side seals

SANUS ısıyla yapıştırılabilen sterilizasyon makaraları, şeffaf PET/PP çok katmanlı kopolimer film ve medikal sınıf kağıttan yapılmıştır. Buhar ve etilen oksit sterilizasyonu için işlem göstergeleri makaraların kağıt yüzeyine uygulanır ve işlenmiş ve işlenmemiş paketleri ayırt etmeye yardımcı olur.

Tüm proses indikatörleri su bazlı ve toksik olmayan mürekkeplerdir ve ISO 11140-1 standardının gerekliliklerini karşılar veya aşar ve sterilizasyon işleminden sonra doğru ve net renk değişimi sağlar.

Geniş standart boyut yelpazesi, her parça için ve çift paketleme amaçları için doğru boyutta bir paketin optimum şekilde seçilmesini sağlar ve EN ISO 11607 gereği olarak SANUS sterilizasyon makarası imalatında kullanılan tüm ekipman, makine ve prosesler, proses validasyonu yapılmıştır.
