Technical Data Sheet

SKIN MARKING SET

Sterile Skin Marking Set

Skin Marking Pens are used by surgeons, dermatologists and healthcare personnel to mark the skin before surgery, perforation, radiology, radiotherapy and radiation therapy. The ink in the pen is alcohol-based. Skin Marking Sets are a temporary use, non-invasive, disposable medical device.

Available Models

Skin Marking Set (Fine Tip)	DLM0008-1
Skin Marking Set (Normal Tip)	DLM0008-2
Skin Marking Set (Double Sided)	DLM0008-3

Features

- Fine, Normal and Double Sided Tips.
- Biocompatible ink.
- Flexible ruler comes in cm and inches.
- Non-toxic and non-tattooing.

Intended Use

It is used by surgeons, dermatologists and health personnel to make markings on the skin before surgery, in perforation, radiology, radiotherapy and radiation therapy. The desired area is marked with a pen. Marking is essential to prevent wrong site surgery and promote patient safety. The ruler is used to draw straight lines and can be used for measurement purposes.

Instructions for Use

1. Peel open the sterile pouch and remove the skin marker and ruler from it.
2. Open the pen cap.
3. Remove oil from the patient's skin with alcohol or soap and water. Allow the area to thoroughly dry,
4. Mark incision locations on the skin according to protocol.
5. Properly dispose of the skin marker and ruller after use.
