DİLEX SURGICAL SCRUB BRUSH IMPREGNATED WITH 7.5% POVIDONE-IODINE

Features

- It is a broad spectrum skin antisepsis containing povidone iodine.
- The iodine contained in the polyvinyl pyrrolidone iodine complex is slowly released and provides an antiseptic effect.
- Foams easily.
- Can be cleaned with water without leaving stains.
- It has a dark reddish brown appearance with a characteristic odour.
- Easy to use with ergonomic brush design.
- Nail interiors are thoroughly cleaned with soft bristles that do not irritate the skin.
- For professional users (healthcare personnel).
- For single use only. Dispose as medical waste after use.
- Do not use if the packaging is opened or damaged.
- Does not contain latex or phthalates.
- Options with or without nail pick are available.
- For external use only.
- Biocompatible.

Tıbbi Ürünler A.Ş

Surgical Scrub Brush Description

Scrub Brushes consist of a polyethylene brush and sponge. In line with customer requests, a nail pick made of polystyrene can be added to the packaging, which is used to clean in and around the nail.

Indications

Scrub Brushes are used for cleaning and disinfecting forearms, hands and nails before and after surgical intervention, dressing and examination.

Physical Characteristics

Scrub Brushes consist of a plastic brush on one side and a sponge on the other. It is produced according to the following dimensions: 8 cm (Length) x 5 cm (Width) x 4 cm (Height). The brush is made of low density polyethylene. The sponge is 22±2 kg/ m3 dense and is polyurethane based. The sponge and brush are glued together via a hotmelt adhesive.

Indications

Scrub Brushes are used for cleaning and disinfecting forearms, hands and nails before and after surgical intervention, dressing and examination.

Use of the Device

Surgical Handwashing: Washing in 3 Steps

Step 1 – Preliminary Wash

- Wet hands, wrists and forearms.
- Apply a sufficient amount of soap/ antiseptic agent and wash from the fingertips to the elbow for a period of 1 minute.
- Hands should be held in an upright position, higher than the elbows at all times.
- Rinse hands, wrists and forearms with plenty of running water.

Step 2 – First Wash/Scrub

- Repeat the same wash from Step 1.
- Scrub each hand and nails individually while counting for 30 seconds per hand; 1 minute in total.
- If the brush is impregnated, the sponge can be used to distribute the antiseptic agent over the hands, wrists and forearms in a downward motion.
- Using the brush bristles, scrub the nails of one hand, using a downward motion to avoid spray contamination (30 seconds).
- Rinse the brush under running water and repeat for the second hand (30 seconds).
- Using the provided nail pick, clean underneath and around the edges of the nails.
- Properly discard of the used brush.
- Rinse hands, wrists and forearms with plenty of running water.

Step 3 – Second Wash

- Repeat the same wash from Step 1 for 2 minutes.
- Dry off from the fingertips to the elbow with a single-use sterile towel.
- Hold hands in an upright position.
- Maintain this position while donning a gown.
